

# Abdul-Azeez Adeleye Software Engineer

✉ message.abdulazeez@gmail.com ☎ +2348109174125 in Abdul-Azeez Adeleye

## PROFESSIONAL SKILLS

### Front End Development

React, HTML5, CSS3, Bootstrap, JavaScript, Wordpress.

### Back-End Development

PHP, MySQL, Node, REST APIs

### Others

Azure, Git, GitHub, Postman

## PROFESSIONAL EXPERIENCE

### Lead, Support Team - Product

10/2023 – present

GFA Technologies

*GFA Technologies (formerly GetFundedAfrica) is a software company focused on solutions that help small and medium sized businesses.*

#### Web Development, Cross-Functional Support and Testing:

- Provided support to other team leads in developing striking user interfaces, synchronizing databases, uploading assets and courses on the Azure cloud platform.
- Conducted rigorous testing procedures to ensure seamless integration and optimal performance of products before deployment.

#### Contributions to FGN-Alat and NYSC-Alat Programme Management Platform:

- Collaborated extensively on the development of the FGN-Alat and NYSC-Alat Programme management platform, empowering over 300,000 individuals to acquire essential soft, technical, and business skills.
- Played a key role in shaping the user interface of the New Remsana App, a Learning Management Software integral to the cohort's course engagement.

*The successful development and implementation of the aforementioned solutions, notably the FGN-Alat platform, led to a substantial increase in customer acquisition, achieving a remarkable growth of 3000%. Within a span of two months, the user base surged from 10,000+ to an impressive 300,000+, underscoring the efficacy and impact of the introduced enhancements. This accomplishment reflects my ability to drive substantial business growth through strategic technological interventions.*

### Software Engineer - Frontend

04/2023 – 10/2023

GFA Technologies

- Crafted series of compelling Landing Pages showcasing the company's products, services, and solutions, contributing to heightened visibility and engagement.
- Spearheaded the comprehensive overhaul of user interfaces across the entire dashboard, login, and registration pages, enhancing overall usability and aesthetics.
- Played a key role in the revision of the GFA Technologies platform, systematically identifying and resolving bugs to optimize functionality and user experience.

*The revision of the platform culminated in a significantly improved iteration of the mobile view for the entire website. The developed landing pages played a pivotal role in highlighting critical solutions, events, products, and services deemed urgent and in high demand. This strategic enhancement not only elevated the overall user experience but also effectively showcased key offerings, aligning with the immediate needs of the company's target audience.*

### Front-End Developer

09/2022 – 04/2023

Eunik Nigeria

#### Eunik's Landing page website as a Fashion Brand.

- Developed a Responsive Landing Page Website for Eunik utilizing Bootstrap, Javascript, and HTML, facilitating a visually engaging digital platform for showcasing products and services to prospective customers.
- Demonstrated commitment to project continuity by diligently maintaining and revising the entire website throughout a three-month contract period, ensuring optimal functionality and relevance.
- Contributed to brand visibility and customer engagement by consistently uploading new products, enabling customers to stay informed about the latest fashion trends and offerings.

**This development of the landing page elevated the Eunik's customer engagement and brand visibility, contributing to a notable 60% increase in the company's revenue.**
